UNITED STATES DEPARTMENT OF AGRICULTURE  
Office of Information  
Division of Photography

5C  
October 1, 1955  
(First Revision)

USDA PHOTOGRAPHS

The Guide Index below is a revised listing of photographs available in the Division of Photography, Office of Information, USDA. Continuing progress is being made in integrating photographs of USDA Agency work into one central library. When this work is completed, the library will consist of approximately 100,000 photographs and negatives of news and general interest. Additional map and chart negatives issued by several agencies of the Department are also on file but have not been included in this listing.

Many more agency photographs must be integrated into the library before this list is completed. Therefore, this listing of photographs will be revised from time to time.

USDA program branches or other operating offices should order photographic services direct from the Office of Information, USDA, using form AD-271, "Request for Photographic Services."

The library is located in the Administration Building, Room 457. You are invited to review the photographs in this central service. Please send any suggestions for other pictures or comments you have to offer to the Division of Photography, Office of Information.
